

How to Draw an Owl

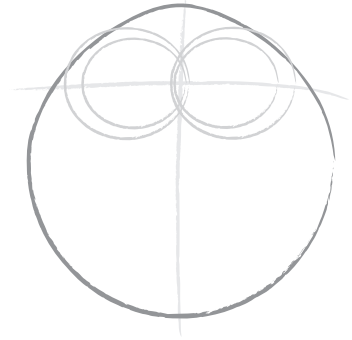

1. Like all birds, an owl starts with an egg, and that's true when you draw one too.

2. Next, lightly draw center lines through your egg to help you line up the eyes and beak.

3. Now lightly draw two circles for the eyes, then another two slightly smaller circles inside.

4. Now rub out where the circles meet. Draw in the beak, ears & feet.

5. Just the eye balls, wings & feathers to add last. Now you can rub out your guide lines and go over all the detail lines making them darker.
